NIKKO S. PARUNGAO

Angeles City, PH

EDUCATION

Bachelor of Science in Computer Science
Holy Angel University — Jun 2023 – Present
- Consistent Dean's Lister
- Officer in the Student Council and various student organizations

Accountancy and Business Management Strand
Brightwoods School — Sep 2021 – Jun 2023
- Graduated as Second Honorable Mention
- Graduated with Honors; consistent Honors Awardee

PROJECTS

Codely: An Adaptive Coding Simulation Platform Using Random Forest Classifier for Technical Interview Preparation of Undergraduate Computer Science Students
Thesis | Documentation, Data Flow and Platform Architecture Designer, Data Cleaning — 2026
- Delivered an adaptive interview-prep platform for undergraduate CS students, as measured by a thesis defense passed with minor revisions, by combining a Judge0 coding environment, a Random Forest model that sets each next problem's difficulty, and Claude API grading of follow-up answers
- Designed the platform architecture and data flow as four incremental builds: a Judge0 coding environment, performance tracking with rule-based classification, Random Forest difficulty prediction, and adaptive feedback with session summaries
- Documented and cleaned interview data from industry practitioners at Shore360 Agency and Toro Cloud and an AI expert consultation, producing key-point analyses, cleaned transcripts, and signed verification documents

TrialBite
Sole Developer — 2026
- Built a food-trial tracking workflow, as measured by 10+ foods logged and classified as safe or unsafe, by letting users start a trial, record severity and reaction notes, update their logs over time, and confirm each food's status
- Added an allergen checker by integrating the Gemini API to scan an uploaded food photo for allergens the user has marked as severe or as having implications
- Shipped the app live as sole developer, building the React frontend, Supabase PostgreSQL database and authentication, and Vercel deployment

HAUbout That Way?: A Smart Directional Guide and Campus Map System for Holy Angel University
Backend Developer | Supabase, SQL, Authentication — 2025
- Mapped the campus for navigation, as measured by 22 named landmarks and 76 path nodes (98 nodes in total) joined by 115 connections, by modeling it as a graph in a Supabase PostgreSQL database of nodes, paths, and bridges
- Delivered step-by-step fastest routes in a Flutter and Dart app that needs no account, by running Dijkstra's algorithm over the graph, limited to paths students normally walk
- Added admin-only authentication through Supabase, keeping the student-facing app free of sign-ups

WattsEnergy: Electricity Usage Forecasting
Backend Developer | Flutter, Data Cleaning, Upload and Parsing — 2025
- Forecast future electricity usage from uploaded consumption data in a group-built Flutter app with no external database, by analyzing patterns across previous months of a public Kaggle energy-consumption dataset
- Prepared the data for forecasting by cleaning the dataset and building the upload and parsing flow that loads consumption files into the app

VirtuoHero
Proposal and Requirements Writer, Pitch Video Editor | Flutter, Gemini API — 2025
- Helped a team place in the top 8 of 32 nationwide hackathon teams, as measured by finalist placement, by co-writing the proposal and requirements for an AI-powered mobile app that supports Filipino freelancers and students in building career skills
- Communicated the product to the judges by editing both of the team's pitch videos

- Helped formulate the product concept: an onboarding quiz that builds a personalized 5–7 step roadmap with Gemini, AI Mentor feedback on submitted text and images, and a Daily Scrum journal with streak badges at 7, 30, and 100 days; shared as a prototype Android APK

LEADERSHIP & ACTIVITIES

Chief of Operations
AWS Learning Club – HAU Jun 2025 – Mar 2026
- Led preparation and setup of the club's booths at events where the organization was invited
- Processed and obtained signatures on documents required for AWSLC events held on campus

Finance Officer
Google Developer Groups on Campus – HAU Jun 2025 – Mar 2026
- Assisted the Finance Chief Officer in collecting payments for organization merchandise
- Attended CFA-led finance seminars on collection, auditing, and accounting

Councilor for Human Relations
CSC-SoC (Student Council, School of Computing) – HAU Jun 2024 – Apr 2025
- Recruited staff members by interviewing candidates and evaluating their traits
- Conducted monthly check-ins with each committee on performance, staffing, and activities

Class Representative
School of Computing – HAU Nov 2023 – Mar 2024
- Relayed faculty announcements and student concerns between faculty and the class
- Communicated CSC-SoC announcements and events to the students in my class

Staff for Finance
CSC-SoC (Student Council, School of Computing) – HAU Jun 2023 – Apr 2024
- Assisted with payment collection and provided manpower when needed
- Collected and recorded receipts to support the final financial statement

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, SQL, C#
Frontend & Mobile Development: JavaScript, HTML, CSS, Responsive Web Design
Backend & Databases: PostgreSQL, Supabase, AWS
Tools & Platforms: Git, GitHub, Figma, Docker

CERTIFICATIONS

- IT Fundamentals+ (ITF+) - CompTIA
- Responsive Web Design Developer Certification - freeCodeCamp
- Relational Database Certification - freeCodeCamp
- AWS Academy Graduate, Cloud Foundations - AWS Academy
- Introduction to Figma - Simplilearn
- CCNA: Introduction to Network - Cisco Networking Academy
- JavaScript Essentials 1 - Cisco Networking Academy
- Endpoint Security - Cisco Networking Academy
- Data Analytics Essentials - Cisco
- AI Fundamentals - IBM SkillsBuild
- Introduction to Generative AI - Google Cloud
- Career Essentials in Generative AI - Microsoft and LinkedIn
